

Put your money where your house is!

When you shop with local businesses, you help our local economy... and that helps you!

Contact your Account Manager or visit www.golocaltacoma.com for more information on buying local!

More of your money stays in the community...

68¢ of every dollar spent to a locally owned business stays in the community, while only 43¢ of every dollar spent at a non-local business stays in the community!*

The money continues to generate local business...

Because money circulates 7 times within the community, the additional dollars staying in the community really add up...it translates to \$728,726 more dollars in the community for every \$1 million in local sales!*

You help keep the local job market growing...

When you buy local, you contribute to the local job market. When goods and services are purchased locally, it generates the need for more local accounting, marketing and legal services, too!

You help support local charities...

Local businesses are much more likely to support local non-profit organizations, youth sports and the arts than national chain stores...so you're helping others when you buy local!

Your tax dollars stay local...

When you shop from local stores, sales taxes go to the local and state government, which benefits the community with money for government provided services!
